remarks:

An instrument by an belgian organ builder is offered.

This organ features through its extraordinary disposition and the distribution of the register on three manuals (with the suitable paddocks) lots of opportunities.

It was very important for the organ builder (who also is a church musician) as many as possible "Stilrichtungen" of the Orgelliteratur on this relatively little organ adequate to play.

This instrument uses „historical parts" (e.g. oboe from England, flute a fuseaux from France) but it is mainly new.

The box is made of european alder.
