General data:

Year of construction:	1856
number of manuals:	1
manuals:	C-f'''
pedal:	C-d'
system:	mechanical
stop action mechanism:	mechanical
Register:	12
Principle-base:	8
height:	520 cm
width:	330 cm
depth:	170 cm

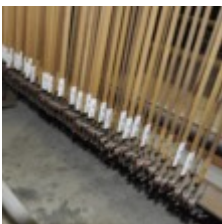

disposition:

Manual:
Bourdon 16'
Prinzipal 8'
Gedeckt 8'
Salicional 8'
Gamba 8'
Octave 4'
Doppelflöte 4'
Octave 2'
Mixtur 4f. 2 2/3'

Pedal:
Violon 16'
Subbass 16'
Oktavbass 8'

couplers:

I/P

remarks:

Josef Anton Bohl built the organ in 1856 for St. Jakob in Aichach Friedberg as a mechanical slider chest organ with a free-standing console and classicist façade.

Josef Anton Bohl lived from 1801 to 1878 and worked as an organ builder from 1827 to 1873.

In 1897, G.F. Steinmeyer added a second manual with a mechanical cone chest to the organ. This cone chest with pipes was badly worm-eaten and only fragments remain. It therefore makes sense to set it up as a single-manual organ with pedal.

Depth of single manual 1700 mm, without console.

Due to the height of the case, the organ can be used as a choir organ for a larger church interior.

The organ has been made playable but needs to be completely restored.

Selling price unrestored € 25,000.00 + MwSt.

Cost of restoration approx. € 80,000.00 to € 100,000.00 + MwSt.
